## DCR-400 CORNER ROUNDING MACHINE

Item#: 04JBDCR400

The **DRC400** is a compact machine designed to make round corners on any material ranging from books, note pads, diaries, cards. Right and left corners can be cut simultaneously in a single stroke. The cutting thickness of up to 100mm combined with a mechanical speed of up to 24 cycles / minute provide optimum output for a one man operation. It is the ideal solution for medium to long runs with a regular output.

| Specifications                        |   |
|---------------------------------------|---|
| Feeding Mode                          | Manual  |
| Paper Size                            | Min: 88 x 55 mm<<br>Max: 400 x 297 mm           |
| Speed                                 | 24 cycles/minute                                |
| Max Cutting<br>Thickness (paper only) | 100 mm  |
| Die Radius from                       | 1/8" to 1"                                      |
| Work Table Adjustable<br>Angle        | Up to 20°                                       |
| Voltage                               | 200/240 V (50 Hz) 1 ph - 110/120 V (60 Hz) 1 ph |
| Power Consumption                     | 0.25 kW   |
| Air Pressure                          | 6 to 8 bars                                     |
| Dimensions                            | 0.84 x 0.83 x 1.31 (H/a) m                      |
| Net Weight                            | 220 kg  |

## Key Benefits & Features:

- The right and left corners can be cut simultaneously in a single stroke. The cutting thickness of up to 100mm combined with a speed of up to 24 cycles / minute provide optimum output for a one man operation.
- The DCR 400 can accommodate a wide range of dies with radius ranging from 1/8" to 1". It can also be operated as a single corner rounding machine.
- Easy adjustments and adjustable work table angle ensure optimum working conditions.
