Excalibur Twin Wheel Cutting Head & Replacement Cutting Wheels

In 2008, Keencut changed the design of the Composite Twin Wheel Cutting Head on the Excalibur Series. The design change has improved the performance and durability to the cutting tool. Due to this design change, the composite twin wheel cutting head part # KX18 and replacement cutting wheels part # KX03 are obsolete and no longer available. If you have an old style (black) cutting head, then you must upgrade to the part # 69125 (gold) cutting head. 69110 replacement cutting wheels for the gold cutting head will not fit the black cutting head.

KX18 (OLD STYLE)

Identified by the Black Mounting plate. The twin wheels do not have internal bearings and are difficult to rotate. This product and replacement wheels are discontinued.

69125 (NEW STYLE)

Identified by the gold mounting plate, and wheels with internal bearings. The Replacement Wheels are EXCOW (Foster # 69110) and only fit the #69125 Head.

Excalibur Replacement Blades and Accessories

Item#	Description
69125	Composite Twin-Wheel Head
69110	Cutting Wheels for gold head (2)
