

Foster ON-A-ROLL LIFTER® UNIVERSAL

FOSTER ON-A-ROLL LIFTER® UNIVERSAL

The flat roll loading tray of the Foster Universal lifter fits printers including AGFA Anapurna, Mira, Tauro and Titan models, as well as many roll-to-roll flatbed cutters. The tray easily fits into the side of the roll loading area, and multiple roll wedge mounting holes enable the operator to position the roll precisely for loading and unloading. The roll loading ramp may be removed to prevent interference with dancer bars and other printer frame elements, and can be stored on the back of the upright frame when not in use. Using the safety straps, one operator can easily lift rolls as heavy as 660 lbs (300 kg) and as wide as 16 feet 5 inches (5 m).

The Foster Universal lifter enables a single employee to safely and efficiently maneuver media rolls through standard doorways and into tight spaces behind printers. The easily reconfigured roll tray can accommodate printers made by different manufacturers.
