

# FUJIPLA HLA-2301

Fujiplas new and Improved automatic laminator, the HLA-2301 ALM Automatic Laminator. With a variable rolling speed of 68 inches per minute, this machine automatically feeds and laminates paper sheets with a thickness of 1.5 to 5 mil and handles cover stock weighing 17 to 100 lb. The multi-thickness feed tray, enhanced roll installation, and improve locking mechanism are just a few of the improvements made to the new HLA-2301 over its predecessors. Other features include a simple-slide paper size and orientation adjustment, an easy-to-use colour screen, and controls.

## Specifications
