## Consistent perfect mounts

- Perfect performance with even the thickest conservation mountboard.
- Blade cartridge system for accurate blade depth control.
- Every Futura individually squared and set up for use straight out of the box.
- Measuring stop for flawless v-grooves.

## Versatile and flexible

- Dual measuring scales (metric and imperial).
- Clip-on, clip-off margin guide and squaring arm.
- Start of cut gauge operates for both production cutting and freehand cutting to pencil lines.
- Blades available to suit every type of mount board.

## No more over and under cuts

- Unique proven micro-stop system quickly calibrates for perfect corners.
- Rigid self-aligning margin guide for consistently accurate parallel borders.

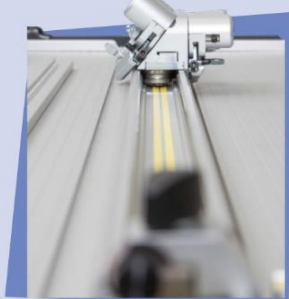

## Perfect ergonomics

- Shaped blade holders perfectly fit the hand to prevent finger strain when cutting even the toughest conservation board.
- Cutter designed to allow both hands to pull the blade holder when cutting. Designed for right or left handed use.
- Lift and hold for hands free working when positioning mounts.

## Unequalled blade control and guidance

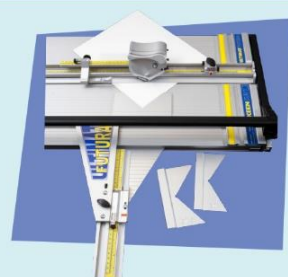

- Zero play cutting head sliding action - set for life.
- Minimal maintenance.
- Large thrust and radial bearings for precision blade control.
- Heavy duty one-piece aluminium extruded base for stability.

## OPTIONAL EXTRAS AND ACCESSORIES

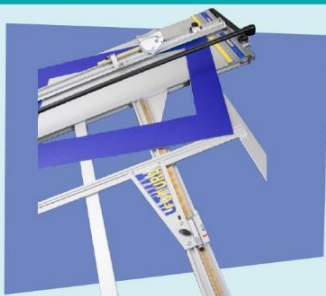

### Multi-angle cutting gauges

Three different angle plates which clip into place instantly to provide predictable and accurate positioning for mount board to be marked or cut on an angle.

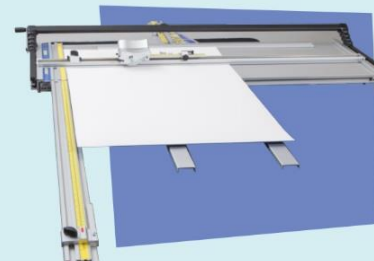

### 75cm extension kit

Kit includes extended margin guide and 60cm support arms for production cutting of borders up to 75cm (30").

### 60cm support arms

Pack of two arms that clip onto the base to increase the width of the base to 100cm (39") holding large boards flat and square by preventing sagging.

## DIMENSIONS
