

Revo Flex
with stand (included)

Revo Flex
Four side trim function
with or without margin.

Revo Flex
Sheet Feed Skew
Adjustment.

Revo Flex

Join the revolution with the all new Revo Flex next generation fully automatic laminator. The Revo Flex 4 side trimming system allows for true flush cuts or encapsulating a sheet with lamination. The position of the cuts are fully adjustable to create perfect flush cuts or custom size encapsulation borders. No need for additional processing to trim all 4 sides of a sheet. Feeding, laminating, cutting and trimming are now fully automated with the press of the start button.

Customer Benefits

- 4 side internal trimming system for flush cut or encapsulation
- New no waste run mode eliminates sheet trim
- Compact design with stand included
- Automatic paper feed, laminate and cutting in one process with one button push start
- Automatically stops when complete
- Adjustable speed for high quality results on various sheet weights and film thickness
- Process up to 420 sheets per hour
- Simple access from top for easy roll change
- Adjustable resist roller pressure to stop multi-sheet feeds over a range of paper stocks
- Feeder holds up to 200 sheets
- Easy to use touch panel for all adjustments
