Seal Material Anywhere w/ FKR-400

- Easy to operate
- Lightweight
- Seal width: 10mm (0.39")
- Seal length: 400mm (15.7")
- Suitable for thicker materials

More Details:

Our FKR-400 is a 16" direct heat portable sealer that is lightweight and easy to use anywhere. Our portable sealers are ideal for sealing small, irregular, or extra long packages. We recommend using this sealer if you are sealing cellophane, coated aluminum foil, Kraft paper, and other thicker materials. Please note direct heat sealers cannot seal polyethylene material.

Equipped with an adjustable temperature controller allows the user to control the amount of heat needed for different material types. A 5-15 minute warm up time is required to achieve the correct temperature. Please DO NOT touch the jaws of the sealer until it has cooled down.

Specifications:

	FKR-400
Seal Width	10mm (0.39")
Seal Length	400mm (15.7")
Power	110V / 500W
Weight	4-lbs

Easy to Operate:

Depending on the material, allow 5-15 minutes of warm up time for the sealer to reach the desired temperature. Turn the temperature controller to the desired setting, the power and heat lamp will turn on. Just insert the material between the jaws and close the jaws for a few seconds. Release the jaw. Increase or decrease the timing until a satisfactory seal is obtained.
