# Impulse Sealer w/ Cutter Deluxe

## FEATURES

- Fewer moving parts
- Wide-field magnet activates heating element
- Less wiring and no microswitch
- Equipped with cutter to cut poly after sealing

**FSC-220 / FSC-320** are deluxe impulse sealers with fewer moving parts and incorporating a simpler design. The FSC-220 / FSC-320 seal poly bags and other thermoplastic materials quickly and efficiently without any warm up time. Materials up to 12" wide and 10mil total thickness can be sealed. The sealer is equipped with a plug-in electronic timer which controls the different sealing times needed for the varying thickness of different materials. The timer LED light will automatically change from red to green to signal the machine is done sealing. We recommend holding the seal bar down for a few more seconds to ensure the seal sets and cools.

Manufacturer's replacement kit includes one element and one PTFE adhesive.

SPECIFICATIONS	FSC-220	FSC-320
Power Supply	110V / 60Hz	
Watts	75W	
Seal Length	8.7"	12.6"
