Evolution Projection Board

with Deluxe Aluminum Trim

Best In Class®

Evolution Projection Board - Deluxe Aluminum Trim

- The versatile Evolution Board is the ideal choice for a multipurpose AV environment. The specially engineered magnetic porcelain steel surface provides rich and vivid projector images.
- Matte gray finish provides excellent sharpness and clarity, reducing dullness caused by external light sources. Intended primarily for use as a projection surface for everyday presentation and media viewing. For a board to be used primarily as a writing surface, please see any of our boards with a white finish such as porcelain steel.
- Evolution surface requires weekly cleaning with a damp cloth for optimum performance. A small amount of marker ghosting may occur.
- Evolution boards are not intended for use with interactive projectors. For interactive projectors with strict flatness requirements, we recommend the Interactive Projector Board or Projection Whiteboard with Polyvision® duo Surface, providing guaranteed results for projectability, erasability and durability.
- Anodized aluminum trim has a .88" profile with hairline mitered corners. Black aluminum trim available at an upcharge. Features a full-length tackable map rail and a full-length accessory tray with rubber Dura-Safe® end caps to eliminate sharp corners.
- Made in the USA. TAA compliant. Fifty year limited warranty.

Part No.	Product Dimensions	Ship Wt.
Evolution Projection Board - Deluxe Aluminum Trim		
404AA-52*	1.5'H x 2'W	10 lbs
404AB-52*	2'H x 3'W	20 lbs

Evolution Technical Information

- Multipurpose magnetic surface that provides exceptional sharpness and clarity with projected images, and excellent writability for dry erase markers.
- Good color contrast with 60% less glare than standard porcelain steel surfaces.
- Damp erasing is required for optimum performance. Some ghosting may occur.
- A precisely balanced porcelain enamel ground coat is furnace-fused to both sides of 28 gauge (standard) or 24 gauge (custom) steel.
- The first furnace fuses a ground coat of enamel that is heat-softened at approximately 1450° F. The second furnace firing fuses a coat of enamel to the ground coat enamel. Color Fusion ceramic top coat is applied providing the desired surface color.
- A fade resistant waterproof resin glue bonds the porcelain to a moisture-resistant core. Custom sizes are available.
