Stack Cutters

Professional Series

Cutting multiple sheets of paper is easy work for a Dahle rolling trimmer or guillotine, but when you need to cut an entire stack, there's no better tool than a Dahle Stack Cutter. These industrial workhorses will give you the precision you need along with the safety you deserve. Each cutter has built in features that will increase the efficiency of your tasks as well as provide a safe and pleasurable cutting experience.

Dahle Professional Stack Cutters are manually operated but make easy cutting of up to 700 sheets of paper at a time. Safety shields can be found on either side of the cutting blade and will not allow the blade to move while they are in the up position. Once the shields are in place, you have the ability to cut cleanly through 500 or 700 sheets of paper with very little effort. This clean, burr free cut through such a large stack of paper is made possi-

ble through a ground Solingen Steel blade and a paper clamp that places even pressure across the entire cutting surface. The spindle driven, self-locking backstop offers extreme accuracy and convenience for repetitive cutting. These cutters can be mounted on any secure table surface although the optional floor stands are recommended for proper cutting height and leverage.

Dahle Stack Cutters are German engineered and can be found in art departments, custom frame shops, and print & copy centers throughout the world.

Features

- Up to 700 Sheet Capacity
- Effortlessly cuts through large stacks of paper
- Built in safety covers on both sides of the blade prevent the blade from moving while up
- Quick action clamp holds work securely and evenly across the entire cutting surface
- Spindle driven self-locking backstop for extreme accuracy and repetitive cutting (846, 848)
- Optional stand provides proper height and leverage for easy cutting

For protection, the blade will not move until this safety cover is placed in the down position.

Effortlessly cut through large stacks of paper with this precision ground, steel blade.

Specifications

Item	Cut Length	Capacity	Dimensions	Optional Stand
