

Standard Features

- **Print, Fold and Seal:** One-step process eliminates excess document handling
- **Document Security:** Enclosed paper path from the printer to pressure sealer ensures security. Ideal for PIN notices or other confidential applications
- **Form Capabilities:** Processes forms up to 14" in length
- **Printer Compatibility*:** Designed to work with HP/Troy P2015, P3005, P4014, 4200, 4250 & 4350 and Lexmark/Source T640 laser printers. A list of other compatible models is available.
- **Installation:** Easy to install, no software required
- **Alignment Base:** Special alignment base holds the printer and pressure sealer securely and slides apart for easy access to the paper path and fold plates
- **Fold Types:** Folds Z, C**, Half and custom folds
- **LED Control Panel:** Notifies operator when the power is on, a cover is open, the paper runs out, or if a fault occurs
- **Fault Detector:** Detects double feeding and any faults
- **Dedicated Use:** Designed for in-line use only
- **Six-Digit Resettable Counter**

Options:

- **P2000IL:** Cost-saving package that includes FD 2000IL System, 18" conveyor and 2 cabinets
- **18" Conveyor w/Photo Eye:** Allows for neat and sequential stacking
- **Locking Cabinets:** Fully enclosed for storage (2 cabinets required)

* See reverse for complete printer specifications

** C-Fold bottom check position only

FD 2000IL System shown with IL Pressure Sealer and IL Alignment Base, laser printer (not included), optional conveyor and optional locking cabinets

Secure Processing of One-Piece Mailers

The FD 2000IL System allows operators to print, fold and seal pressure-sensitive one-piece mailers in one step, reducing processing time while increasing document security. The IL System works in-line with model-specific MICR and Non-MICR desktop laser printers. The fully-enclosed paper path is designed to conceal confidential documents, including PIN notices, checks, school grade reports and health care information.

The IL System incorporates the industry-leading FD 2000 AutoSeal® which features a user-friendly LED control panel and pre-marked fold settings for 11" and 14" standard forms. The FD 2000IL is ideal for companies processing sensitive documents or those looking for a mid-volume in-line solution for processing pressure seal forms.
