Parts List

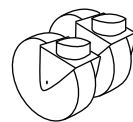

A x3

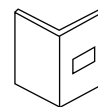

B x2

C x2

D x2

E x12

F x12

G x12

H x12

J x4

L x4

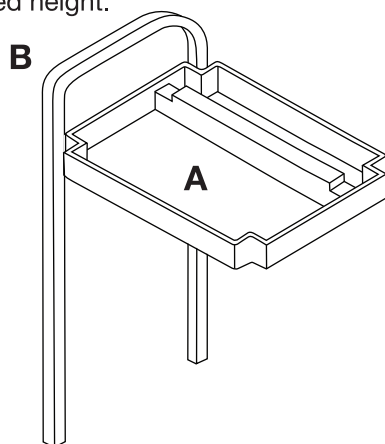

M x1

K x4

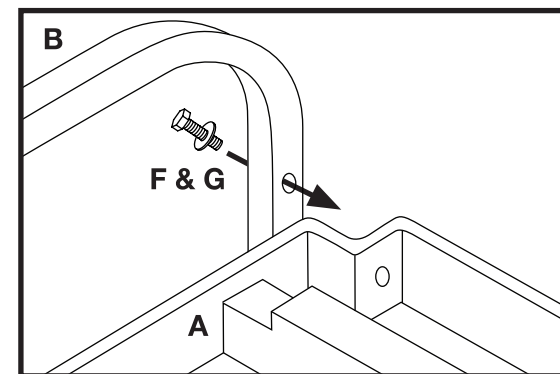

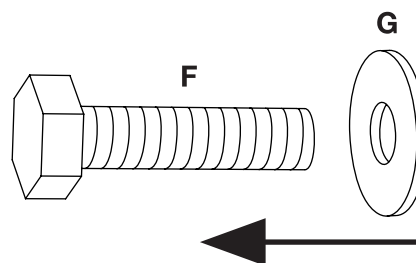

1

Take one Tubular Frame **B** and lay flat. Hold Molded Tray **A** to desired height.

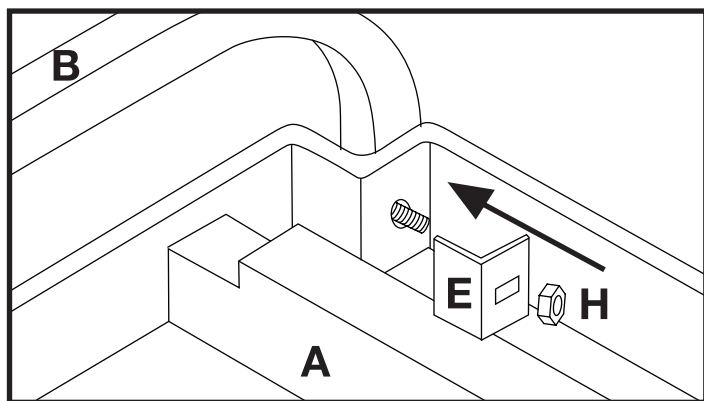

2

Gather 2 Angle Brace **E**, 2 Hex Bolt **F**, 2 Washer **G** and 2 Nut **H** pieces. Put Washer **G** onto Hex Bolt **F**. Then, insert the combined pieces into the hole on Tubular Frame **B** coming from the outside.

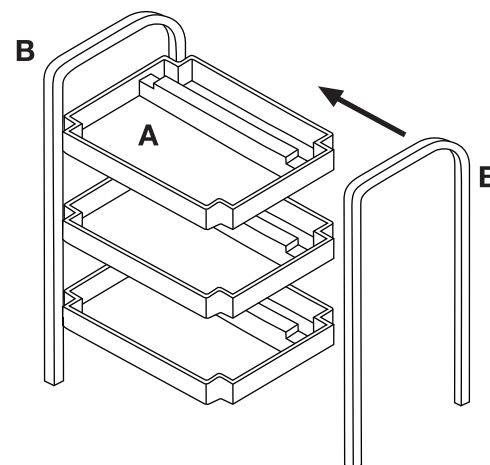

3

Take Angle Brace **E** and put it on the inside of Molded Tray **A** over Hex Bolt **F**. Take Nut **H** and put it on the end of Hex Bolt **F** and tighten.
Note: Do not tighten screws all the way.

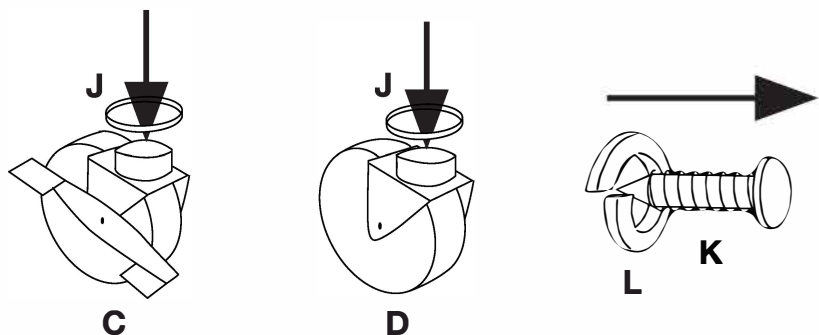

4

Attach the 2 remaining Molded Tray **A** pieces onto the Tubular Frame **B** as Step 1. Assemble the second Tubular Frame **B** onto the other side of the Molded Tray **A** pieces.

5

Gather 2 Caster **C**, 2 Caster **D**, 4 Spring Washer **L**, 4 Screw **K**, and 4 Ring Seater **J**. Put 1 Ring Seater **J** over the stem of Caster **C** and 1 over the stem of Caster **D**. Then put Spring Washer **L** over Screw **K**. Repeat for all of the pieces.

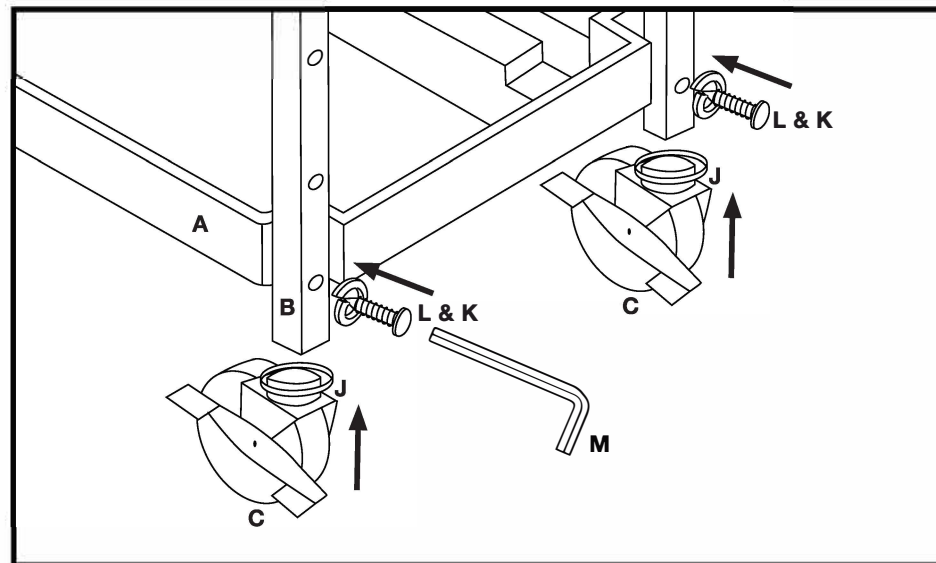

6

Hold Caster **C** (with Ring Seater **J** on it) up in the bottom of Tubular Frame **B**. Insert Screw **K** (with Spring Washer **L** on it) into the frame and using Hex Wrench **M**, secure the Caster. Do the same with all of the Casters.

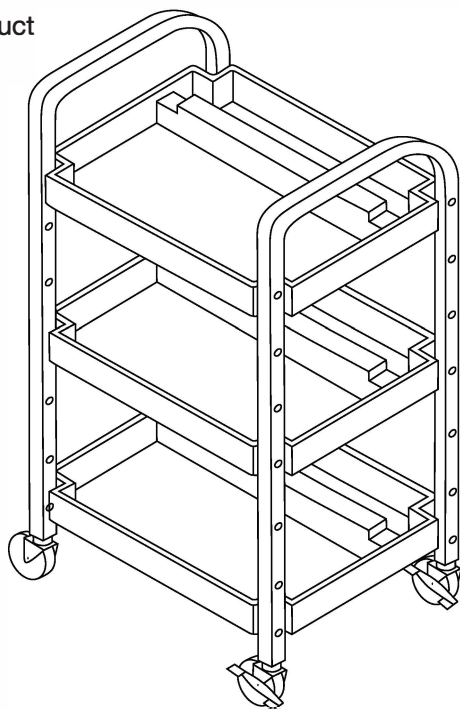

Note: Both Caster **C** pieces should be attached on the same side as shown.

Note: Once Casters are attached, go back and tighten all Screws until secure.
