Features

The number one selling One-Step system in the U.S.A. offers sealing and shrink-wrapping in one easy step. The compact size which includes a stand with castors makes it very easy to transport. The operator can easily view the product while shrinking for quality control. There is less adjustment time required between different package sizes and types. The One-Step system consumes less energy than standard two-step systems. Low cost and quick payback makes these machines affordable even for small businesses.
